Designed to work

For 150 years, the name Giroflex has been synonymous with seating excellence - a pioneering brand defined by cutting-edge technology and innovation, helping active people and active minds sit and work better.

## giroflex 40

A health-focused, ergonomic design featuring all the hallmarks of a Giroflex chair - visually simplified to create a softer more approachable chair - perfect for the office or the home.

giroflex 40 is an elegant, energizing contribution to the workplace environment. Designed by ITO Design, it is an office chair incorporating the trademark Giroflex synchro-mechanism & dual-zone seating philosophy whilst emphasizing a more approachable and intuitive office seating.

Rounded edges, wrap around mesh and subtle controls offer a visual simplicity more commonly found in the home, whilst under the hood is a powerful seating machine offering comfort, support and a first class sitting experience.

The resulting experience is an approachable and timeless chair that can easily be adapted between individuals and endure the workload of office use as well as providing enough comfort for home office.

Black aluminium

### Synchronised mechanism

giroflex 40 is designed with synchro motion, empowering natural body movement as you recline in the chair. The more backward you recline the seat, the more your upper body will open up. This movement is created by the synchro mechanism, which drives the motion of the seat and backrest individually, at a ratio of approximately 1:2.
