

giroflex 656

giroflex
designed to work

“ Above all a perfect chair must be as flexible as its occupant and supportive at all times. Precisely this was crucial for the design of the giroflex 656. ”

*Carmen and Urs Greutmann,
Greutmann Bolzern Designstudio, Zurich*

LOOKS BRILLIANT, IS EXTREMELY FLEXIBLE AND SETS NEW STANDARDS.

With the giroflex 656 chair family Switzerland's seating centre of excellence presents the perfect synthesis of design and comfort. A groundbreaking concept that combines aesthetics with high technology.

Whether flexible swivel chair, practical conference chair or welcoming visitor's chair: the new giroflex 656 is distinguished by its light, delicate, yet striking design and its extreme ease of use.

Thanks to its calm appearance, the wide variety of feature options and the many colours to choose from, giroflex 656 goes with any room concept. First-class Swiss manufacturing quality and premium components make it a long-lasting, sturdy companion.

The new Shiftmove synchronized mechanism, which can be instantly adjusted in eight stages to body weights from 45 to 150 kg, provides consistently even back tilt resistance with maximum freedom of movement. In addition, the height- and depth-adjustable lumbar support ensures optimum posture.

SWIVEL CHAIR

THOSE WHO WORK HARD SHOULD HAVE IT EASY. IN ANY POSITION.

giroflex 656 – Swivel chair: available in various backrest heights and seat widths, with innovative lumbar support. Unique, specially developed Shiftmove synchronized mechanism for linear back tilt resistance. Either with 3D or fixed armrests. With leather or fabric cover in various colours or with black 3D knitted fabric. All models with castors for soft or hard floors. Aluminium 5-arm base, optionally polished or powder-coated. Optionally available with headrest and coat hanger.

Giving our best since 1872. So every detail is perfect.

When you're sitting properly, you feel better, you're more motivated and you get more done. In its own research and development department in Koblenz, Switzerland, Giroflex develops defining concepts that actively support sitting. Every single seat is characterized by innovation, functionality and aesthetics, and proves how profoundly familiar Giroflex is with ergonomics and work physiology.

For consistently even back tilt resistance: the new Shiftmove synchronized mechanism for seat occupants from 45 to 120 kg or optionally to 150 kg.

The new height- and depth-adjustable lumbar support ensures maximum seating comfort.

No matter how heavy its occupant is: the new Shiftmove synchronized mechanism makes it easy. In an instant the back tilt resistance can be adjusted to the individual weight in eight stages by means of a rotary knob. The Shiftmove synchronized mechanism supports the pelvis and back at all times and offers maximum flexibility. Also available with Freefloat mechanism.

So everyone from the smallest to the largest occupant feels comfortable, the height and depth of the lumbar support can be adjusted to suit the individual's body. The pressure in the lumbar region is always pleasantly even, and ensures maximum comfort in any sitting position.

giroflex 656 – Visitor's chair: available as a cantilever made of rectangular steel tube or as a 4-legged chair. Stackable versions also available. Aluminium frame, polished and chromium-plated or powder-coated. Backrest optionally with leather or fabric cover or with black 3D knitted fabric. Armrests optionally with hand-sewn leather sleeves.

giroflex 656 – Conference chair: available with leather or fabric cover in various colours or with black 3D knitted fabric. With open or closed armrests. Optionally with hand-sewn leather sleeves for the open armrests. 4-arm base optionally in polished aluminium or powder-coated with castors or glides.

giroflex 656 – Conference chair: thanks to impressive design with perfect proportions and a range of different versions, the giroflex 656 conference chair is welcome everywhere – in the meeting room, the seminar room or the conference area. Designed for active sitting, it helps handle even the longest meeting comfortably.

giroflex 656 – Visitor's chair: it's as light as it looks and finds favour in a small group in the reception or waiting room. The stackable giroflex 656 visitor's chair is available as a cantilever or a 4-legged chair with rectangular tubing. Both delicate and robust in design, it has everything needed to allow convenient, comfortable sitting.

With 'Cradle to Cradle' Giroflex brings together what belongs together: quality, design and ecology.

Anyone who works sitting down should be able to have the confidence that his or her chair is free of harmful substances. This is one of the reasons sustainability has been a part of everything we do at Giroflex for decades and is constantly being expanded.

'Cradle to Cradle': giroflex 656 shows how it's done. The 656 series shows how important the clever, careful and economical use of resources is for Giroflex: with the label 'Cradle to Cradle' all models comply with stringent conditions – from material purchasing, development and production to recycling. So their components flow almost 100% back into the production cycle.

Many steps, clear goals: a tradition of ecology. Mono-material separation, the first fully recyclable model range in Europe and the environmental standard ISO 14001: Giroflex has been a pioneer in office ecology since the 1980s. New facilities and targeted measures have resulted in massive savings in CO₂, water, electricity and gas. Short distances need less fuel: nearly everything is produced in-house. In addition, Giroflex disposes of office chairs properly and if requested supplies its products with the 'climate neutral' label. And finally, suppliers are also rigorously checked.

Swiss made: Swiss quality is worth it!

Since 1872, Giroflex has been working in Switzerland, in Koblenz, with the highest standards of quality and ecological compatibility. This will

remain so in future too. Because the concentration of the core competencies with qualified staff in one place is worth it for you. Here, with a great deal of work done by hand together with state-of-the-art manufacturing technologies, first class chairs and armchairs are made that are in daily use worldwide and support their owners with the greatest possible comfort.

5-year guarantee: Giroflex provides a 5-year full warranty on its quality products covering construction, mechanism and workmanship.

Services: We clean, repair and maintain office chairs on your premises or ours, analyse your seating furniture, advise you free of charge and ecologically dispose of office chairs of all brands.
