

ONGO®Stand – sitting while standing

With the ONGO®Stand ONGO® Active Sitting supports people who have realized that it is healthier and more productive to stand while they work. It also supports those who have to stand because of their work requirements, but want to have relief without restricting their flexibility. This way the ONGO®Stand meets all requirements for active and thereby healthy sitting.

Of particular note on the ONGO®Stand are both the seat and the elastic support of the center column in the 3-arm aluminum base. The shape of the seat was chosen according to ergonomic requirements so that the user can both sit comfortably on it as well as lean against it, when using it as a typical standing aid. To adjust the position and inclination of the seat optimally to the working conditions, the center column is not rigid but flexibly mounted in the base. At the same time this flexible base allows a large radius of action, helping the user complete their tasks efficiently.

The ONGO®Stand is easy to adjust to the ideal height with its hydraulic lift. The 3-arm aluminum base supports the dynamic shape and offers a secure grip through its non-slip gliders, even when cables or humidity are on the floor. The ONGO®Stand comes either with a polished aluminum base or with a more robust matt finish. The seat is available in black or white. An optional seat cushion in various colors and materials can be clipped to the seat and is easily replaced. This makes the ONGO®Stand ideal for many different applications such as the factory, office, reception or home.

The timeless design and high quality workmanship of ONGO®Stand meet the highest standards of sustainability. A further contribution to a positive environmental impact is the fact that the ONGO®Stand, like all products of ONGO®Active sitting, is made in Germany.

Product informations

- height 61-90 cm (24-35.4 in)
- seat 37x30 cm (14.6-11.8 in), available in black and white
- optional seat cushion in 3 colors of microfiber fleece (black, grey, henna) or washable skai® nature base grey
- height adjustable by gas spring with automatic reset
- elastic support of the standpipe
- 3-arm foot 53x33 cm (20.9x13 in)
- non-slip gliders in NBR
- optionally available in ESD-compatible design
- made in Germany
- 3 years warranty

Materials

- seat cover:
 - a) microfiber fleece: 88% polyester and 12% polyurethane, 70% recycled polyester, light fastness > 5, cycles > 50,000 (Martindale test - ISO 12947-1-2-3-4)
 - b) skai® nature base - approx. 80% natural and renewable raw materials, Öko-Tex standard 100, meets German medical product requirements, durable, lightfast, abrasion-resistant
- seat foam: CFC-free polyurethane foam
- seat (saddle seat): PA6 GF30
- height adjustment lever: PA6 GF30
- cone holder at the seat: aluminum
- gas spring: steel/aluminum/plastic
- elastic bearing: NBR/steel
- collar: silicone
- cone holder at the bottom: aluminum/steel
- base: aluminum
- gliders: NBR
